LITHIK BEVERAGE ERP

Dashboard (Executive Overview) - Detailed User Manual

Comprehensive user guide for the Dashboard module.

Module Purpose

- Provides a real-time overview of factory operations.
- Displays financial KPIs and production statistics.
- Acts as the main navigation page after login.
- Shows live business performance using Firebase data.

Header

- Company logo.
- Dashboard title (Overview).
- User profile picture.
- Profile picture opens the Admin page.

Executive Dashboard

- Today's Live Report.
- Current date display.
- Daily Net Profit card.
- Revenue (Sales).
- Expenses.
- Raw Material Purchases.
- Invoices Billed.
- Production Quantity.
- Filling Quantity.
- Labour Present Today.

Charts

- Bar chart for Revenue, Expenses, Raw Materials, Production and Filling.
- Pie chart showing business metric distribution.
- Automatic chart refresh from live database.

Navigation

- Dashboard.
- Billing.
- Production.
- Filling.
- Inventory.
- Purchase.
- Sales.
- Parties.
- Expenses.
- Accounts.
- Labour Attendance.

Business Logic

- Automatically redirects unauthenticated users to Login.
- Reads live data from Firebase Firestore.
- Calculates Net Profit = Sales - Expenses - Raw Material Cost.
- Updates KPIs automatically.
- Supports desktop and mobile responsive layouts.
- Includes Progressive Web App (PWA) installation prompt.

Validation & Features

- Real-time aggregation.
- Profile image persistence.
- Responsive charts.
- Navigation highlighting.
- Missing Firestore index alerts.
- Secure authenticated access.

LITHIK BEVERAGE ERP

Finished Inventory Module - Detailed User Manual

Comprehensive guide for the Inventory page.

Module Purpose

- Maintain finished goods inventory.
- Store MRP, selling price and available stock.
- Support Billing, Production and Sales modules.
- Monitor low-stock and out-of-stock products.

Header & Navigation

- Inventory page title.
- Low Stock Filter toggle.
- Desktop and mobile navigation menus.

Main Dashboard

- Search finished goods.
- Add Product (+) button.
- Inventory cards.
- Stock quantity display.
- MRP and Selling Price display.
- Low-stock and out-of-stock highlighting.

Add/Edit Product Form

- Product Name.
- MRP.
- Selling Price.
- Opening Quantity.
- Save Product button.
- Automatic recipe initialization for production.

Inventory Card Actions

- Edit product.
- Delete product.
- View stock quantity.
- Display selling price and MRP.

Inventory Workflow

- Create finished product.
- Production increases stock automatically.
- Sales reduce stock automatically.
- Billing uses available stock.
- Low stock filter helps replenishment.

Business Logic & Validation

- Search with generated search tokens.
- Low stock filter.
- Automatic pagination.
- Confirmation before delete.
- Success and error notifications.
- Opening quantity normally starts at zero.
- Inventory integrates with Production, Billing and Sales.

LITHIK BEVERAGE ERP

Production Module - Detailed User Manual

Module: Production & Recipes - LITHIK BEVERAGE

Module Purpose

- Create and manage production batches.
- Automatically deduct raw materials using recipe definitions.
- Increase finished goods stock after production.
- Track machine, operator, damages and production history.

Header Options

- Date filter and clear filter.
- Machine Master.
- Recipe Master.
- Responsive desktop/mobile navigation.

Production Dashboard

- Search by batch number or product.
- Add Production Batch button.
- Production cards with status and quantity.
- Date-wise filtering.

Production Entry Form

- Batch Number.
- Production Date.
- Machine Selector.
- Operator Name.
- Finished Product selection.
- Quantity Produced.
- Production Target.
- Bottle Damage.
- Preform Damage.
- Shift/Timing.
- Remarks.
- Auto calculated Raw Material Deduction table.
- Save & Deduct Stock.

Recipe Master

- Create recipe for every finished product.
- Map multiple raw materials.
- Quantity per unit.
- Edit existing recipes.
- Delete recipe mapping.

Machine Master

- Add machine.
- Delete machine.
- Use machines in production batches.

Automatic Business Logic

- Recipe automatically calculates raw material requirement.
- User can record wastage.
- Stock deducted from Raw Goods.
- Finished Goods stock increased.
- Deleting production reverses inventory transactions.
- Firebase transactions maintain stock integrity.

Validation & Controls

- Mandatory fields before save.
- Configured recipe required.
- Configured machine required.
- Confirmation before delete.
- Toast notifications for success/errors.

LITHIK BEVERAGE ERP

Purchase & Raw Goods Module - Detailed User Manual

Page: Purchase & Raw Goods - LITHIK BEVERAGE

Purpose

- Record raw material purchases
- Maintain supplier bills
- Update godown stock automatically
- Calculate GST
- Maintain purchase history

Header Options

- Company logo
- Purchase title
- Date filter
- Clear filter
- Master Raw Goods button

Main Screen

- Search supplier/bill
- Add Purchase (+)
- Purchase card list
- Infinite scrolling

Purchase Form

- Supplier Name
- Invoice Number
- Purchase Date
- GST selection (0/5/12/18/28%)
- Dynamic material rows
- Quantity
- Unit Cost
- Base amount
- CGST
- SGST

- Grand total
- Save purchase

Master Raw Goods

- Add official raw material
- Unit of Measure
- Opening stock
- Current stock
- Edit stock quantity
- Delete material

Business Logic

- Only master materials can be purchased
- Automatic stock increase on purchase
- Automatic stock reversal on delete
- Edit history maintained
- Search tokens for fast search
- Firestore transaction-based updates
- Responsive mobile and desktop UI
- Toast notifications and confirmation dialogs

Filling Module – Detailed User Manual

Comprehensive user guide for the Filling Operations module.

1. Module Purpose

- Manage finished filling operations.
- Convert empty bottles into finished filled products.
- Automatically update inventory.
- Track filling company, DC number and production records.

2. Header & Toolbar

- Company logo and Filling page title.
- Date filter to view records by day.
- Clear filter button.
- Recipe Master shortcut.
- Search box for filling company.
- Add (+) button to create a new filling log.

3. Filling Log Form

- Date field.
- DC Number.
- Filling Company.
- Dynamic item rows.
- Finished Product selection.
- Empty units used.
- Rejected pieces.
- Filling cost.
- Save & Update Stock button.

4. Filling Recipe Master

- Create filling recipes.
- Map finished goods to empty bottle inventory.
- Choose empty material.
- Single-piece or Pack/Box mode.
- Pack size configuration.
- Edit and delete recipes.

5. Inventory Workflow

- Select finished product.
- System deducts empty bottles automatically.
- Finished goods stock increases automatically.
- Reject quantity is recorded.
- Inventory and production remain synchronized.

6. Record Management

- Search filling logs.
- Filter by date.
- Delete filling logs with automatic stock reversal.
- Infinite scrolling and pagination.

7. Validation & Security

- Mandatory Date, DC Number and Company.
- Recipe must exist before saving.
- Automatic Firestore updates.
- Responsive desktop/mobile interface.
- Toast notifications.
- Authentication required before access.

8. Business Rules

- Finished goods are created only through configured recipes.
- Deleting a filling record reverses stock.
- Pack calculations are automatic.
- All transactions are stored with timestamps.
- Recipe configuration controls inventory deductions.

LITHIK BEVERAGE ERP

Billing Desk Module – Detailed User Manual

Detailed user documentation for the Billing Desk module.

1. Module Purpose

- Create GST invoices for customers.
- Search inventory and add products to the bill.
- Calculate GST, discounts and transport charges automatically.
- Print professional tax invoices and update inventory.

2. Customer Details

- Customer Name.
- Invoice Date.
- Phone Number.
- Payment Mode (Cash, Online, Credit).
- Customer Address.

3. Product Entry

- Inventory search with autocomplete.
- Product selection.
- Rate including GST.
- Quantity.
- Discount.
- GST percentage (5%, 12%, 18%, 28%).
- Add to Bill.

4. Current Bill

- Cart item list.
- Edit by removing products.
- Transport charges.
- Custom invoice number.
- Automatic invoice numbering.

5. Tax Calculation

- Taxable Value.
- CGST.

- SGST.
- Total GST.
- Discount.
- Transport charges.
- Grand Total.

6. Save & Print Workflow

- Validate customer details.
- Save invoice to Firestore.
- Reduce inventory automatically.
- Generate invoice number.
- Generate QR code.
- Print professional GST invoice.

7. Print Layout

- Company details.
- GSTIN.
- Customer information.
- Invoice number.
- Invoice date.
- Product table.
- Tax summary.
- Signature area.
- Footer and payment information.

8. Validation & Security

- Authentication required.
- Cannot bill without stock.
- Quantity validation.
- Automatic inventory update.
- Responsive desktop and mobile support.

LITHIK BEVERAGE ERP

Sales Module - Detailed User Manual

Page analyzed: Sales Ledger - LITHIK BEVERAGE

Module Purpose

Sales Ledger manages invoices, customer sales records, billing history, searching, filtering, printing, returns, stock updates and sales summaries.

Main Screen Features

- Header with company logo and Sales title.
- Date filter and clear filter button.
- Daily Sales Summary popup.
- Search customer or invoice.
- New Invoice (+) button.
- Sales cards with invoice, customer, payment mode and totals.
- Desktop sidebar and mobile navigation.

Invoice Card Logic

- Click card to open return/edit screen.
- Click invoice number to print invoice.
- Payment badges: Cash, Online, Credit.
- Shows invoice date, customer, products and total.

Sales Workflow

- Create invoice from Billing.
- Invoice saved to Sales collection.
- Inventory automatically reduced.
- Accounts updated.
- Invoice available for search, print and returns.
- Return processing restores inventory and recalculates invoice.

Available Functions

- Search invoices.
- Filter by date.
- Print GST invoice.

- Delete invoice with stock reversal.
- Product return.
- View edit/return history.
- Daily revenue summary.

Business Logic

According to the HTML, the module includes automatic inventory restoration during returns/deletions, role-based navigation, invoice printing, date filtering, payment-mode summaries, and responsive desktop/mobile layouts. It is integrated with Billing, Inventory, Accounts, Parties and Dashboard modules.

Accounts & Financial Reports Module - Detailed User Manual

Comprehensive user documentation for the Accounts module.

1. Module Purpose

- Monitor monthly financial performance.
- Compare current month with previous month.
- Calculate net profit automatically.
- Generate GST reports and export documents.
- Download customer invoices.

2. Dashboard

- This Month financial summary.
- Last Month financial summary.
- Sales revenue.
- Raw material purchases.
- Production cost.
- Filling cost.
- Business expenses.
- Automatic Net Profit calculation.

3. Visual Analytics

- Monthly bar chart.
- Doughnut chart for expense distribution.
- Live Chart.js updates.
- Responsive charts.

4. GST Reports

- Start Date selector.
- End Date selector.
- Sales report export.
- Purchase report export.
- Export as PDF.
- Export as Excel (CSV).
- Export as JSON.

5. Invoice Download

- Invoice number search.
- Generate GST invoice PDF.
- Customer details.
- Item table.
- GST summary.
- QR code.
- Signature section.

6. Navigation & Header

- Company logo.
- Dashboard title.
- Download Bill shortcut.
- GST Reports shortcut.
- Sidebar navigation.
- Bottom navigation for mobile.

7. Business Logic

- Firebase Authentication.
- Firestore aggregate calculations.
- Server-side financial totals.
- Automatic profit calculation.
- Live monthly comparison.
- Financial analytics.

8. Security & Validation

- Login required.
- Date validation.
- Invoice validation.
- Toast notifications.
- Responsive desktop/mobile design.
- Dark and light mode support.

Labour & Attendance Module - Detailed User Manual

Module Overview

- Manage labour master records.
- Mark daily attendance.
- Generate monthly attendance reports.
- Export attendance to CSV.
- Maintain wages and payroll data.

Header

- Date selector for attendance.
- Month selector for reports.
- Desktop and mobile navigation.

Tab 1 - Mark Attendance

- Select attendance date.
- Worker list.
- Full Day (P).
- Half Day (H).
- Absent (A).
- Automatic attendance save.
- Attendance stored per day.

Tab 2 - Labour Roster

- Search labour.
- Add labour.
- Edit labour.
- Delete labour.
- Worker name.
- Phone number.
- Role.
- Daily wage.

Add/Edit Labour Form

- Full Name.
- Phone Number.
- Role / Job Title.
- Daily Wage.
- Validation before saving.

Tab 3 - Monthly Report

- Monthly picker.
- Daily attendance grid.
- Present/Half/Absent indicators.
- Total working days.
- Total wages.
- Export CSV.

Business Workflow

- Create labour record.
- Mark attendance daily.
- Automatic wage calculation.
- Generate monthly report.
- Export for payroll.

System Features

- Firebase Authentication.
- Firestore database.
- Responsive design.
- Search.
- Toast notifications.
- History-safe modals.
- Validation and security.

LITHIK BEVERAGE ERP

Administrator Console - Detailed User Manual

Comprehensive documentation for the Admin module.

1. Module Purpose

- Manage ERP users and administrator permissions.
- View all registered users.
- Edit user information.
- Assign or revoke administrator access.
- Delete user accounts securely.

2. Header

- Back button.
- Admin Console title.
- Current user profile photo.
- Current user name.
- Current user role badge.

3. User Management Dashboard

- Responsive user grid.
- User profile image.
- User name.
- Email address.
- Role badge (Admin/User).
- Infinite scrolling.
- Skeleton loading cards.

4. User Profile Actions

- Edit Profile button.
- Open edit modal.
- Update full name.
- Enable or disable Administrator access.
- Save changes.
- Delete user account.

5. Edit User Modal

- Hidden User ID.
- Full Name field.
- Administrator toggle switch.
- Delete button.
- Save Changes button.
- Loading spinner while saving.

6. Business Workflow

- Administrator logs in.
- System verifies admin permissions.
- Loads users from Firebase Firestore.
- Displays user list.
- Administrator edits or deletes users.
- Changes saved instantly.

7. Security & Validation

- Firebase Authentication required.
- Firestore user management.
- Role-based access control.
- Validation for empty names.
- Delete confirmation.
- Responsive desktop and mobile design.
- Dark and light mode support.

8. Additional Features

- Sticky header.
- History-aware modal.
- Mobile back-button support.
- Profile image fallback.
- Pagination and infinite scrolling.
- Loading indicators.
- Error handling.

Recipe Module & Page Connection

Recipe Workflow

Purchase Raw Materials → Purchase Page → Raw Material Inventory → Production/Recipe Page → Stock Verification → Automatic Raw Material Deduction → Beverage Base Production → Filling Page → Finished Inventory → Billing.

How the Recipe Works

The Purchase page records raw materials. Inventory stores available stock. The Production page creates recipes and production batches. During production, recipe ingredients are automatically deducted from inventory and converted into beverage base. The Filling page records filled pieces, rejected pieces, good pieces, pieces per case, total cases, and filling cost. After saving, finished goods inventory is updated and products become available for billing.

Piece & Case Calculation

Good Pieces = Filled Pieces – Rejected Pieces

Cases = Good Pieces ÷ Pieces per Case

Remaining Pieces = Good Pieces MOD Pieces per Case

Example

Filled Pieces: 2400

Rejected Pieces: 24

Good Pieces: 2376

Pieces per Case: 24

Cases Produced: 99

Remaining Pieces: 0

Software Supply Terms & Conditions

Effective Date: _____

These Terms & Conditions apply to the supply of the ERS software solution and related services.

1. Scope

The software is provided as agreed in the quotation, proposal, or invoice. Any feature not specifically included is considered outside the original scope.

2. Payment

Unless otherwise agreed in writing, full payment must be completed according to the invoice terms. Delayed payments may delay support or delivery.

3. Refund Policy

No refund will be provided after the software has been used for more than seven (7) calendar days from delivery or activation. Before that period, refunds, if any, are at the company's sole discretion and only if no significant customization has been completed.

4. Additional Features

Any new feature, customization, integration, report, workflow, or enhancement requested after project approval or delivery will be treated as additional work and will be charged separately.

5. Bug Fixing & Support

Bug fixes for defects in the original delivered software are provided free of charge for six (6) months from the delivery date. After six months, bug fixing, maintenance, updates, and technical support will be chargeable according to the current service rates.

6. Change Requests

Changes requested after development begins may affect cost and delivery timelines.

7. Client Responsibilities

The client is responsible for providing accurate requirements, testing the software, maintaining backups, and reporting issues promptly.

8. Acceptance

The software will be deemed accepted if the client starts using it or does not report major issues within seven (7) days of delivery.

9. Intellectual Property

All source code, designs, and intellectual property remain the property of the software provider unless otherwise agreed in writing.

10. Limitation of Liability

The company shall not be liable for indirect, incidental, or consequential losses arising from the use or inability to use the software.

11. Governing Terms

Any exception to these terms must be agreed in writing by both parties.

Client Name: _____

Authorized Signature: _____ Date: _____
